## SKILLS

Next.js	React.js	JavaScript	TypeScript	Tailwind
CSS	HTML	Git	GitHub	Framer Motion
React Query	Vercel	Vite	Vitest	Jest
i18next	React Router	Webpack	Firebase	Axios

## PROJECTS

**codeHire** - <https://code-hire-cvbuilder.vercel.app/>

An ATS-optimized resume builder designed to help tech professionals and HR recruiters.

**Features:** Real-time resume editing, tips for crafting ATS-friendly resumes, download as PDF or print directly, ATS optimization, responsive design, seamless navigation with React Router and local data persistence.

**Tech Stack:** React, JavaScript, Context API, CSS, React Router, localStorage.

**Authentication Project** - <https://auth-project-firebase.vercel.app/>

A modern authentication app built with React and Firebase, featuring a responsive and user-friendly interface.

**Features:** Sign up and login with email/password, Google authentication, password reset via e-mail and responsive layout (desktop and mobile).

**Tech Stack:** React, TypeScript, Firebase Auth, Tailwind CSS, React Router, Context API.

**SkyWatch** - <https://robertofrz.github.io/sky-watch/>

A weather forecast app focused on user experience. It uses the Geolocation API and WeatherAPI to provide weather data for any city, featuring a clean and responsive design.

**Features:** Automatically fetches user's local forecast, search for cities worldwide, toggle between Celsius and Fahrenheit, add/remove favorite cities and mobile-friendly interface.

**Tech Stack:** React, JavaScript, Vite, React Query, Zustand, Axios, CSS.
